

# INTRODUCTION

We live in a world that is rapidly changing and developing, and we are constantly seeking to digitalize our daily activities, and one of the essential aspects of our daily life is education.

The COVID-19 pandemic has resulted in schools shut all across the world. Globally, over 1.2 billion children are out of the classroom.

As a result, education has changed dramatically, with the distinctive rise of e-learning, whereby teaching is undertaken remotely and on digital platforms.

# SMART LEARNING

Smart learning is a learning management system (LMS) software application for the administration, documentation, tracking, reporting, automation and delivery of educational courses, training programs, learning and development programs.
